Trapping Zone
Adhesive/snap traps
Adhesive/Pitcher Intermediate traps
Pitcher and pitcher-derived traps
1
Aerial
Ground
Amphibious
Aquatic
2
Thin, filiform, adhesive leaves
Triphyophyllum peltatum
Drosophyllum lusitanicum
Drosera regina
Pinguicula heterophylla
Roridula gorgonias
3
Broad adhesive leaves
Pinguicula vulgaris
Pinguicula acuminata
Pinguicula ibarrae
Drosera schizandra
Drosera prostratoscaposa
Drosera cuneifolia
4
Rapidly-closing traps
Drosera burmannnii
Drosera sessilifolia
Dionaea muscipula
5
Aquatic snap trap
Aldrovanda vesiculosa
6
Simple funnel-shaped pitchers, adhesive inner walls
Nepenthes aristolochioides
Nepenthes talangensis
Nepenthes eymae
Nepenthes inermis
7
Highly curled adhesive leaf
Pinguicula lutea
Pinguicula grandiflora
Pinguicula villosa
(and many other Pinguicula)
Gain of carnivory
Darwin's hypothesis for the origin of Dionaea/ Aldrovanda
Pitcher hypothesis for the origin of Utricularia
* Hypothesized extinct forms in Lentibulariaceae
8
Erect, trumpet-shaped pitchers
Nepenthes mirabilis
Nepenthes faizaliana
Sarracenia leucophylla
Sarracenia alata
Heliamphora tatei
Heliamphora heterodoxa
9
Short, squat pitchers
Nepenthes ampullaria
Nepenthes rowanae
Sarracenia purpurea
Sarracenia rosea
Cephalotus follicularis
Extinct pitcher plants*
10
Horizontal eel-trap pitchers
Darlingtonia californica (juv.)
Sarracenia psittacina
Some Genlisea (e.g. aurea)
Extinct pitcher plants*
11
Aquatic "pitchers"
Genlisea aurea
Genlisea repens
Utricularia wannani
Utricularia dichotoma
(and many other Genlisea and Utricularia)
